

根据缩放系数绘制缩放后的 Image

1. 简述:

略。

2. 实现:

```
- (UIImage *)scaleToScale:(float)scaleSize {  
    UIGraphicsBeginImageContext(CGSizeMake(self.size.width * scaleSize, self.size.height * scaleSize));  
    [self drawInRect:CGRectMake(0, 0, self.size.width * scaleSize, self.size.height * scaleSize)];  
    UIImage *scaledImage = UIGraphicsGetImageFromCurrentImageContext();  
    UIGraphicsEndImageContext();  
    return scaledImage;  
}
```
