

绘制不带填充色的圆角边框标签

1. 简述：

UI 设计需要在列表中展示该标签。约

2. 实现：

```
- (void)drawRect:(CGRect)rect
{
    // Drawing code
    [super drawRect:rect];

    if (self.cornerRadius == 0) {
        self.cornerRadius = self.bounds.size.height/2.0f;
    }
    UIBezierPath *path = [UIBezierPath bezierPathWithRoundedRect:self.bounds cornerRadius:self.cornerRadius];
    [[UIColor clearColor] setFill];
    [path fillWithBlendMode:kCGBlendModeNormal alpha:1];
    [self.lineColor setStroke];
    path.lineWidth = 1;

    [path addClip];
    [path stroke];
}
```
