正则匹配去除文本的 html 标签

1. 简述：如题

2. 实现：

```objc
//遍历html
-(NSString *)getZZwithString:(NSString *)string{

    if (string.length==0) {

        return @"";
    }
    {
        NSRegularExpression *regularExpretion=[NSRegularExpression regularExpressionWithPattern:@"<[^>]*>|\n|&nbsp|\r"
                                                        options:0
                                                        error:nil];
        string=[regularExpretion stringByReplacingMatchesInString:string
                options:NSMatchingReportProgress range:NSMakeRange(0, string.length) withTemplate:@""];
        return string;
    }
    }
```

1. 简述：如题

2. 实现：
