# 使用 autolayout 后获取 frame 不正确

1. 简述：如题。

2. 解决方法：从view controller生命周期看，

   view did load

   view will appear

   view will layout subviews

   view did layout subviews

   view did appear

   view will disappear

   view did disappear

   分别在view did load, view will appear, view will layout subviews, view did layout subviews, view did appear里面打印下image view 的frame.

屏幕快照 2016-01-15 上午11.18.54.png

发现，从 view did layout subviews 开始才正确。所以应该把视图配置代码放在这个方法里，并且设置 flag 防止多次执行配置代码
